

## The Banter Kit

### Portable Communications System

The Banter kit was engineered to provide a convenient, portable communications system for up to 4 people. The Banter system provide crystal clear, reliable communications and can be transported easily in it's lightweight, waterproof case.

## Do you require reliable communication on the water in all weather conditions?

The Banter Kit was built with the sailor in mind. It is perfect for coaching teams, communicating with those up on the rigging or on smaller, recreational boats. All elements of the banter kit are designed to be top-performers in the harsh salt-water environment.

The standard Banter kit comes with our Racewear headset, "Bob". The headset is worn over the ears and behind the head, allowing for sunglasses and hats to be worn simultaneously. It also boasts a latch push-to-talk button, an IP68 rated microphone, and is custom-made to suit sailor connector requirements.

## Do you require reliable, rugged audio solutions?

The Big Blue Maritime Banter Kit can be linked into the Diamond Wired and Wireless Intercom system. This opens up options for boats that need to link up with other boats, or for smaller crews that may expand. The Banter Kit can be used in conjunction with radios, or easily be upgraded if the crew expands to be part of a larger Diamond Wireless Intercom network.

The Banter Kit has the ability to link up to a larger wireless system when it comes into range of a paired wireless hub, while having autonomous communications when out of range—created to suit landing parties from larger yachts or boarding crews.

## Banter Kit Key Features

Weight, including portable case	< 4kg
Case dimensions	411 x 322 x 168 mm
Range	200m from hub
Components	1 body pack hub 4 body packs 4 Bob headsets Charging cables Waterproof case
Cable length of Bobs	Custom—60cm as standard
Body Pack weight	200g
Body Packs	IP67 rated
Microphone	IP68 rated; highly directional; designed to filter out wind noise
Microphone fluffy	Custom designed to filter out wind and ambient noise without compromising speech
Headset Fit	Behind the head length adjustable
